# SANSStorage

SANS Storage 150 Series
(STIS150)

Network Video Recorder

The SANS Storage 150 Series Network Video Recorder (NVR) provides customers with high definition IP recording for single and remote site locations that require additional throughput. This video surveillance appliance is equipped with enterprise class components and provides excellent performance for small security and surveillance deployments. Utilizing the latest technology, the 150 Series provides users with flexible configurations options to design the surveillance system tailored to their individual projects.

KEY FEATURES

- Onboard RAID for enhanced performance

- Open platform design to add and change cameras as project demands

- Adaptive form factors to fit different installations

- Throughput is VMS dependent

PRODUCT SPECIFICATIONS - STIS150

SYSTEM
